International services

We have a great deal of experience of working with clients whose lives, whose assets and whose families cross international borders.

Our international services are designed to help those clients structure their UK and international wealth effectively.

Our aim, typically, is to secure the family's future plans in a way which achieves tax efficiency and brings them peace of mind.

As well as working directly with these international clients, we also work with a range of family offices, acting as adviser to the advisers. We help these family offices navigate the complex legal and regulatory environment, enabling them to provide joined-up and proactive advice to their clients.

Our expertise encompasses the widest range of assets from the personal to the commercial. We regularly advise families on investment portfolios, on

their business affairs, on real estate and on luxury assets including fine art and classic cars.

For more information on our international services please refer to our International Private Wealth brochure..
